CORE COMPETENCIES

- Analytics & Reporting
- Data Analysis
 - KPI Design
 - Dashboards
 - Business Reporting
- Tools & Platforms
- Advanced Excel
 - Power Query
 - SQL Server
 - Power BI
- Enterprise Systems
- ePROMIS ERP
 - JD Edwards
 - Inventory Analytics

TECHNICAL PROFICIENCY

Excel & Power Query	95%
Dashboard Development	92%
SQL Server Reporting	85%
ERP Analytics	90%
Power BI / Visualization	82%

CERTIFICATIONS

- ISC2 Certified in Cybersecurity (CC)
- Fortinet Cybersecurity Certifications
- Computer Engineering Professional Diploma

EDUCATION

BSc in Computer Science

Negros Oriental State University

JUNMARVI R. TAMPAC

- DATA ANALYST
- OPERATIONS ANALYST
- REPORTING SPECIALIST
- SQL
- EXCEL
- POWER QUERY
- ERP ANALYTICS
- DASHBOARD DEVELOPMENT
- BUSINESS REPORTING

EXECUTIVE PROFILE

Results-driven **Data Analyst & Reporting Specialist** with **10+ years** of experience transforming ERP, inventory, procurement, asset, and operational data into actionable business intelligence across large-scale UAE and GCC projects. Expert in **Advanced Excel automation, Power Query, and SQL Server reporting**, with a proven record of building **KPI dashboards** that streamline decision-making and reduce manual reporting effort. Combines deep operational insight with strong data validation, reconciliation, and visualization skills to deliver accurate, audit-ready reporting and measurable process improvement.

KEY ACHIEVEMENTS

- Automated reporting workflows with **Excel & Power Query**, significantly cutting manual effort and turnaround time.
- Built **KPI dashboards** for inventory, diesel consumption, procurement, and asset monitoring.
- Consolidated reporting & analytics across **multiple UAE & GCC project locations**.
- Supported audits through **large-scale inventory reconciliation** and stock validation.
- Delivered **operational insights** that informed management decisions and process improvement.
- Centralized fragmented project datasets into a **single source of truth** for management reporting.

PROFESSIONAL EXPERIENCE

- Senior Material Controller — Data & Reporting Specialist** Feb 2016 – Present
- ADC Energy Systems LLC — Dubai, UAE**
- Develop **automated reporting solutions** using Excel, Power Query, and ERP data sources, replacing manual processes with repeatable analytics pipelines.
 - Analyze PO, MR, GRN, MI, stock transfers, asset movements, and procurement transactions to surface trends and exceptions.
 - Design and maintain **KPI dashboards and management reports** for operational performance monitoring across projects.
 - Perform **inventory reconciliation, variance analysis, and audit reporting**, ensuring data accuracy and internal control compliance.
 - Monitor diesel consumption, asset utilization, and inventory performance metrics through structured analytics.
 - Consolidate and transform large multi-project datasets into **centralized business intelligence reporting**.
- Storekeeper — ERP & Inventory Operations** Apr 2014 – Feb 2016
- Gulf Technical Construction Company (GTCC) — Dubai, UAE**
- Processed inventory and stock-movement transactions through **Oracle JD Edwards ERP**.
 - Maintained accurate inventory records and produced stock movement reporting.
 - Supported inventory reconciliation, procurement activities, and internal control procedures.

- English — Professional
- Filipino — Native

TECHNICAL PROJECTS

Diesel Consumption Analytics Dashboard
Built KPI monitoring and compliance reporting for fuel consumption and issuance tracking, giving management real-time visibility into usage trends and variances.

Inventory Reconciliation Framework
Designed reconciliation processes linking stock ledgers, auditor records, and closing stock reports to ensure data integrity and audit readiness.

Power Query Automation Platform
Automated consolidation of multiple project reports into centralized dashboards, eliminating repetitive manual data preparation.

ERP Reporting & Analytics
Built reporting structures across ePROMIS and JD Edwards supporting inventory, procurement, asset, and operational analysis.

KPI Dashboard Development
Created management-ready dashboards translating operational metrics into clear visual indicators for faster, data-driven decisions.

Asset Monitoring Reports
Developed asset utilization and movement reports enabling proactive tracking of equipment performance and availability.
